## About Bromgrove

Bromgrove is a multi-disciplinary engineering organization with unparalleled experience and expertise in the fields of supply, logistics, construction and engineering. We have implemented numerous projects for government agencies, military organizations and public and private investors across the United States, United Kingdom, Middle East, South West Asia and Africa.

At Bromgrove we pride ourselves on our construction and engineering capabilities, always striving to provide best value to our clients. Our dedication, loyalty, wealth of experience and depth of expertise enables us to assist our clients professionally, reliably and honestly.

Our ability and flexibility to react quickly to our clients requirements, plan and coordinate our tasks efficiently and deliver products of the highest quality within the most efficient timescales makes us the go to service provider.

Our team is made up of highly skilled expats, other country nationals and local employees, this combination of skills and expertise enables us to offer clients a full turnkey solution. We have a stable, long serving management team who believe in the core ideals of the company and are constantly striving to be the best.

## Engineering Solutions

With offices in six countries, Bromgrove can meet and more often exceed our clients project requirements globally. Our engineering expertise includes: design, civil, electrical, mechanical and structural engineering.

Bromgrove has a highly dedicated, robust and experienced construction division, over the years we have honed our skills and increased our strength in this field. This has allowed us to become leaders in implementation of multi-faceted construction projects worldwide. Using safe and high-quality systems of work that are recognised internationally we aim to provide a first-class service at all times.

We are committed to providing the products clients would expect from a first-class group of engineers, an expert team of tradesmen using the highest quality tools and equipment. Our commitment to our clients starts at planning stage and follows through and past handover. Bromgrove fully understands its obligations and will always try to exceed expectations.

### Engineering Capability

Bromgrove employs highly experienced professionals from all over the world. Our teams are encouraged to not only identify the problems every project faces but to always offer a measured solution at the same time. We expect our people to act as members of your team and shared success is the best kind of success.

Our engineers are trained to follow the specification and understand the full requirements of the projects we undertake, they are also expected to follow best practice, understand international standards and codes to ensure we deliver high quality compliant projects.

## Design Capability

Along with our standard ACAD design capabilities, Bromgrove's 3D modelling and conceptual design service helps our clients to see and fully understand the viability and feasibility of a project at planning stage, before the main design package is created. This allows us to move onto full design whilst reducing the number of revisions needed.

Bromgrove focus to deliver a product which meets the clients expectations, we go the extra mile to ensure this happens. We believe that one of the most critical parts of any concept is that our stakeholders fully understand what is possible and can envision the final product.

## Project Management

Bromgrove's project management teams are used to operating in some of the most challenging locations across the globe. Our clients turn to us for consistent and expert control of all key personnel, sub-contractors and locally sourced personnel. Our experience in managing cross-cultural teams is unmatched.

## Value Engineering

Bromgrove are constantly looking for safer, faster and more efficient ways to carry out our tasks and deliver our projects. During the lifespan of the project, we constantly assess options that can reduce time and offers financial savings. The process used is well-structured and ensures clients are offered options throughout the lifespan of the project that show benefits of value engineering in the design, materials, construction and methodology.

## Procurement

Bromgrove has a global strength for procurement, our global knowledge of suppliers and manufacturers, added to our ever expanding vendor network allows us to provide our clients with best value and timely execution for every requirement each and every time. Our satellite office in Europe has a global database of trusted suppliers and a network of shipping options that meets all the demands of the project. Clients rely on Bromgrove's expertise, timely response and delivery.

## Supply & Logistics

Bromgrove has a large and extensive network of vendors. We can offer a turnkey supply and logistics solution that will satisfy any requirement our clients may have. We work closely with our clients to fully understand the requirement, understand how best to satisfy that requirement in the most efficient way.

## Machinery & Equipment Leasing

Bromgrove offers a full and comprehensive service solution. We supply vehicles, construction equipment, tools, machinery with full operations and maintenance support to our clients. Our vast experience in equipment leasing enables us to match our client's needs globally. We can manage the whole supply chain process of delivery, maintenance of all of our equipment including provision of consumables to ensure the long lasting life of all equipment leased.

## Fabrication

Bromgrove's Engineers main focus is to constantly look for methods and solutions to improve the concept of fabrication and materials. Our engineers work closely with our clients to build tailored needs. Our record has proven we have made savings for our clients to both schedule and cost.

### Specialist Fabrication

Bromgrove performs fabrication and assembly from strategically located yards where we can assist our clients projects in the best way. We can provide both onsite and off-site fabrication services to suit the requirements of the project for maximum customer benefit.

## Construction

Bromgrove has a proven history of performing construction projects in some of the most challenging regions of the world. We have the ability to deliver the highest standard of services even in the most remote and hostile areas. With our team of dedicated and specialised staff sourced internationally and locally, we are fully prepared to deliver safely and professionally. We take pride in bringing diverse cultures together and encourage the local workforce to adopt our team spirit and work ethic.

### Civil & Heavy Engineering

Bromgrove with its wide range of experience in the construction and engineering field can perform simple and complex projects professionally. From geotechnical and topographical surveying to floating wharfs and asphalt roads, our experience is vast and wide-ranging.

### Engineering Design Structures

Bromgrove's clients require accommodation, storage solutions for materials and equipment, workshops and other facilities. We have strategic agreements in place with key PEB and LEB suppliers in multiple regions and have successfully carried out numerous projects using these systems. The lightweight and extremely fast production and erection of this system makes it a convenient and cost effective solution. Bromgrove utilizes this system with our turnkey approach to the installation of secure compounds, provision of power, water and wastewater installation and commissioning.

## **Modular Units**

This is an extremely popular relocatable system with our clients. The modular unit uses the most common panel available in the market. These are utilized as offices, ablution units and office space up to 500m<sup>2</sup>, and is a very flexible solution for construction and engineering camps.

## **Tent & Fabric Solutions**

Tents have developed over the years to become a robust and long-lasting solution with rapid installation of man camps and accommodation. Bromgrove uses tents made from high strength fabric which come with steel doors and windows and can be compartmentalised into smaller internal rooms. These tents are fully air-conditioned and come with outlets, switches and full lighting systems. This method has proved to be a cost-effective solution to our clients.

## **Power Generation**

Bromgrove has researched and developed the most cost effective and efficient power generation solutions for its accommodation and warehousing systems. We have incorporated tried and tested technological advancements in solar energy and increased the energy efficiency of our buildings. We can provide a fully engineered solution for our clients considering the life time costs of each structure and its inhabitants, offering a long-term cost saving for minimal cost impact incorporating advancements into our system.

## Maintenance

In all locations Bromgrove can provide a bespoke solution to ensure maximum performance and ensure full use of assets. Working days and productivity lost due to lack of regular maintenance can impact any project severely therefore this is critical to the smooth running of any operation. Bromgrove are able to offer a complete solution including lease, rental and personnel.

### Manpower Supply

Bromgrove supports our clients with the provision of vetted experts, engineers, designers, project Managers, life support workers and administrators, OSHA safety engineers, I.T specialists, retail staff, specialised security consultants, logistics specialists and other professional resources to provide and/or augment our clients contracts and projects.

### Inspection & Testing Management

Bromgrove meticulously plans and executes a management service designed to reduce the risk of failures and increase the lifespan of equipment and machinery. Using internationally accredited engineers, Bromgrove can easily work in specialised areas and build bespoke solutions in line with our clients requirements.

### Asset Management

Bromgrove is very experienced in operation and maintenance. Using its highly skilled and knowledgeable staff, we can offer solutions of in-depth assessments and formulate best practices right from planning to management of assets.

# Supply and Logistics

Distributed Ledger Technology / Blockchain

We collaborate with our client to design, develop and deliver world class products that are critical to their business needs, through our dedicated, secure and controlled client operations centres.

## Product Engineering Services

Our Product Engineering services and solutions are tailored to accelerate product development process for our clients, enabling them to shrink the turnaround time across the product development lifecycle and introduce products faster to market. We stay at the forefront of new trends and discoveries and provide value to our clients by helping them quickly respond to market demands, build intelligent products, and ensure profitability by reducing development costs.

Solutions Offered:

### Product Services

- Enterprise Computing
- Scalable Cloud Computing
- Mobility Solutions
- ERP & CRM Platforms
- Database & Business Intelligence
- IoT Computing
- Artificial Intelligence

### Engineering Services

- Research and Innovation
- Software Development
- Software QA and Testing
- DevOps Services
- Software Maintenance
- Technology Migrations
- Consulting Services

## BI & Data Analytics

Bromgrove's Business Intelligence and Data Analytics services enable organizations to effectively aggregate, integrate, and validate data and uncover relevant insights in real time. We help our clients transform data into intelligent insights with predictive modelling by using data mining, text mining, and forecasting. Bromgrove's Business Intelligence and Analytics team can help you extract more insights from your data.

## ERP Services

Bromgrove has an adequate experience of implementing ERP rollouts for our prestigious customers and has developed mature processes that would benefit to minimise the learning curve and communication gaps, and it enables us to deliver upon seamless ERP rollouts and upgrades which meets our client's business and technical requirements.

### Solutions on offer:

SAP ECC Implementation | SAP Solution Manager services | SAP HANA | SAP Application Lifecycle Management | SAP GRC, SAP Business Objects | SAP Mobility | SAP FIORI | NetSuite OneWorld | Netsuite ERP | Netsuite CRM+ | Oracle

## IT Infrastructure

Bromgrove has been consistently providing in-depth customized IT Infrastructure Solutions to our clients across industries. We power your business with IT Service management and consulting services to help it stay relevant, flexible, and competitive, while boosting performance and productivity with our unique IT infrastructure solutions. Our IT solutions follow an end-to-end approach, which enable us to deliver unified management of infrastructure and applications, getting your business ready for its transformational journey.

## **AI & Machine Learning**

We use Artificial Intelligence algorithms to help machines learn themselves from the data they are exposed to and arrive at conclusions, simulating human intelligence. Our data scientist have profound knowledge and experience in designing, implementing and integrating artificial intelligence applications specific to customers business.

## **Distributed Ledger Technology / Blockchain**

Our bespoke team of in-house blockchain developers can take care of the full development stack, from back to front end. Although we have our own specific project under development we are not averse to working with clients on their projects to develop their ideas and apply our experience and field expertise.

# Retail Services

## Retail Services

Bromgrove's rapidly growing retail arm is providing customers with their demand for high quality goods and merchandise. With a name our customers have grown to trust and rely on Bromgrove as the local retailer that operates a diversified portfolio of sports, fitness, hardware and consumer durables from well-known brands.
